HARRISON COUNTY SHERIFF'S OFFICE
Mechanic Job Description

Position Title: Vehicle Mechanic/ Mobile Electronic Installer	Base Salary Range: \$40,000.00 annually
Supervised By: Fleet Manager	

ESSENTIAL FUNCTIONS:

Under the general supervision of the Vehicle Maintenance Supervisor, performs skilled mechanical work of above-average difficulty and responsibility related to the maintenance and repair of automotive and related mechanical equipment. Incumbents possess sophisticated knowledge and skill in performing mechanical tasks involving general repair, maintenance, and servicing of automotive and related equipment and are capable of exercising good judgment and individual initiative in handling routine work and special assignments. Work assignments are made orally or in writing and work is reviewed through observation of results and periodic evaluations.

For security and safety purposes employees performing in this position will be required to undergo corrections certification training. To fulfill the mission, goals, and objectives of the Harrison County Sheriff's Office, officers and employees must have the ability to perform a variety of detention and support functions that are *essential* to the positions they fill.

An applicant for the position of Mechanic within the Harrison County Sheriff's Office who cannot perform these essential tasks will not be accepted or retained. A current employee in this position who is not able to demonstrate proficiency in performing these tasks will be referred to the Harrison County Sheriff's Office administration for appropriate action.

SPECIFIC DUTIES:

In addition to the essential functions and general duties outlined above, a Mechanic of the Harrison County Sheriff's Office performs the following specific duties. The Mechanic will:

1. Repair, recondition, and perform preventative maintenance and service work on automotive and related equipment.
2. Perform various repairs on engines, cooling and air conditioning systems, transmissions, drivelines, suspension, and ABS brake systems.
3. Diagnose electrical system malfunctions, including issues with wiring, connections, or faulty equipment
